SYED FAHAD ABBAS

AI ENGINEER | FULL-STACK SOFTWARE DEVELOPER

Islamabad, Pakistan • +92 304 1646924 • fahadnshuu1@gmail.com
Portfolio: sfak.space • LinkedIn: in/syed-fahad-abbas-kazmi • GitHub: github.com/1faadi

PROFESSIONAL SUMMARY

Full-stack software engineer specialising in AI-powered applications and production LLM systems. Experienced across the full delivery lifecycle, architecting scalable back ends, building interactive front ends, and integrating Retrieval-Augmented Generation (RAG), vector databases, and intelligent automation into real products. Strong command of TypeScript, Next.js, Nest.js, React and modern AI tooling, backed by solid PHP/Laravel and database engineering fundamentals. Effective communicator and self-directed remote collaborator with a track record of delivering high-quality, user-focused solutions on time.

TECHNICAL SKILLS

AI / ML: Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), LangChain, LangGraph, LlamaIndex, Vercel AI SDK, vector databases, embeddings, prompt engineering, AI workflow automation, agentic systems, computer vision (Roboflow, Segment Anything Model / SAM)

AI Tooling & Agentic Dev: Model Context Protocol (MCP) servers & integrations, Claude Code (custom Skills, Rules, Hooks, Sub-agents), n8n workflow automation, voice AI agents (Vapi), AI-assisted / "vibe-coding" workflows (Cursor, Claude Code), agent orchestration & automation

Languages: TypeScript, JavaScript, PHP, SQL, HTML5, CSS3

Frameworks & Libraries: Next.js, React, Nest.js, Node.js, Laravel, jQuery, Bootstrap

Databases: PostgreSQL, MySQL, Supabase, Neon (serverless Postgres), relational schema design & query optimisation

Practices: REST API design & third-party integration, responsive / cross-browser development, version control (Git), Agile delivery, performance optimization

Professional: Remote collaboration, client communication, project & timeline management

PROFESSIONAL EXPERIENCE

BXTrack Solutions — AI Engineer *June 2025 – Present*
Islamabad, Pakistan

- Design and build AI-powered features for production applications, including LLM-driven functionality, RAG pipelines, and intelligent automation.
- Architect and integrate vector databases and embeddings pipelines to support retrieval-augmented and context-aware AI systems.
- Develop and maintain agentic workflows using MCP servers, custom Claude Code Skills, Hooks, and Sub-agents to automate engineering and product tasks.
- Build workflow automations with n8n, connecting APIs, databases and AI models to automate business processes end to end.
- Develop voice calling AI agents using Vapi, integrating telephony, LLMs and conversational flows for automated call handling.
- Build and deploy computer-vision pipelines using Roboflow-trained models and the Segment Anything Model (SAM) for object detection and image segmentation tasks.
- Collaborate with cross-functional teams to translate AI capabilities into user-facing product features, from prototyping through production deployment.
- Evaluate and adopt emerging AI tooling and frameworks (LangChain, LangGraph, LlamaIndex, Vercel AI SDK) to improve delivery speed and system reliability.

BXTrack Solutions — Associate Software Engineer *June 2023 – Jan 2024*
Islamabad, Pakistan

- Designed, built and maintained full-stack web applications using Laravel and React, delivering features across the full stack from database to UI.

- Developed dynamic, component-based front ends with React, integrating them with Laravel back ends.
- Architected and consumed RESTful APIs and integrated third-party services, improving application functionality and extensibility.
- Optimized application performance by refining database queries and reducing load times across client projects.
- Managed project timelines, scope and deliverables, coordinating with stakeholders to ship features on schedule.
- Collaborated with the team to introduce modern development patterns and improve code quality across projects.

Brainiac Creative Solutions — Laravel Developer (Remote) *Jan 2023 – May 2023*
Sargodha, Pakistan

- Architected, developed and maintained robust, scalable web applications using the Laravel framework.
- Collaborated with distributed teams via regular video calls, chat and email to align on requirements, share progress and resolve issues.

Brainiac Creative Solutions — Web Designer (Internship) *Oct 2022 – Jan 2023*
Sargodha, Pakistan

- Translated visual concepts into responsive, accessible web interfaces using HTML, CSS, Bootstrap and JavaScript.
- Applied responsive design techniques with CSS media queries to ensure consistent experiences across devices and screen sizes.

KEY PROJECTS

Traceo — Co-Founder & CTO (Own Product) — *Browser developer tool / Chrome extension*

- Designing and building Traceo, a browser extension that helps developers and QA teams inspect CSS, capture visual bugs and record sessions, then share them as actionable reports.
- Own the product end to end, product design, front-end engineering, and go-to-market materials including the pitch deck.
- www.traceo.dev

University ERP System — Final Year Project (FYP) — *2025 – Present · In collaboration with the official NUML team, National University of Modern Languages, Islamabad*

- Working with the official NUML team to design and build an Enterprise Resource Planning (ERP) system for university operations, covering modules such as student, academic and administrative management.
- Contributing to full-stack development, database schema design and module integration as part of a multi-member project team.

Hairstyle-ai — Solo Developer — *AI hair-styling visualization web app*

- Built an AI-powered hairstyle visualization tool that lets users preview different cuts and styles on their own photo.
- Implemented the full TypeScript stack — model prompting, image handling, and a Next.js UI deployed to Vercel.
- hairstyle-ai-dun.vercel.app

AI Job Scraper — Solo Developer — *AI-assisted job discovery & scraping tool*

- Designed a job-search workflow that scrapes listings and uses an AI layer to summarise, filter and rank roles for the user.
- Built end to end — scraper logic, data normalisation, and a TypeScript UI deployed on Vercel.
- ai-job-scraper-seven.vercel.app

Maqsam Voice Agent — AI Engineer — *2025 · Voice agent with telephony integration*

- Designed a voice agent UI integrating LLMs and telephony so callers can interact with an AI-driven flow.
- Built TypeScript front-end, voice/event handling, and deployment to Vercel.
- maqsam-voice-agent.vercel.app

AI Video Analyzer (V1, V2 & Backend) — AI Engineer — *2025 · AI-powered video analysis platform*

- Built an AI video analysis platform spanning two front-end iterations (V1, V2) and a Python backend that runs the heavy analysis workloads.
- Implemented video ingestion, model inference, API design, and a TypeScript UI for results and playback.
- ai-video-analyzer-v2.vercel.app · github.com/1faadi/AIVideoAnalyzer-Backend

FloorPlanSegmentor — AI Engineer — *2025 · Computer-vision tool for floor plans*

- Built a floor-plan segmentation tool that processes architectural plans and extracts structural regions using CV techniques.
- Owned the TypeScript UI and integration with the segmentation pipeline.
- floor-plan-segmentor.vercel.app

Pharmafy (Pharmacy Management) — Web Developer — *2025 · Pharmacy management web application*
- Built a pharmacy management product — inventory, records, and order workflows — in TypeScript / Next.js.
- Deployed on Vercel with a Postgres-style data model and modular UI.
- pharmafy.vercel.app

Symptra — AI Engineer — *2025 · Healthcare-oriented web application*
- Developed a healthcare-focused TypeScript web app exposing symptom / care workflows through a Next.js UI.
- Shipped on Vercel; designed for clean module boundaries and easy iteration.
- symptra.vercel.app

Core42Ops — Solo Developer — *2025 · Operations dashboard & internal tooling*
- Built an operations-oriented dashboard for monitoring and internal tooling workflows using TypeScript and Next.js.
- Implemented data views, layout and a Vercel deployment pipeline.
- core42-ops.vercel.app

BrandBrain — Solo Developer — *Brand & marketing intelligence tooling*
- Designed a brand and marketing intelligence tool that organises insights and supports decision-making for marketers.
- Shipped a TypeScript / Next.js web app deployed on Vercel.
- brandbrain.vercel.app

BXAssist — Solo Developer — *AI productivity assistant*
- Built a TypeScript assistant for everyday productivity / workflow tasks with an AI-driven interface.
- Implemented prompt orchestration and a clean Next.js UI deployed on Vercel.
- bx-assist.vercel.app

AI-Gen Storybook — Solo Developer — *AI-generated UI/component storybook*
- Built an AI-assisted Storybook generator that produces component stories and documentation from inputs.
- Streamlines design-system documentation for front-end teams.
- ai-gen-storybook.vercel.app

VercelBot (TalkJunkie) — Solo Developer — *Bot automation around Vercel workflows*
- Built a bot that automates Vercel-centric developer workflows (deployments, status, project actions).
- Implemented the integration layer and a TypeScript UI for interactions.
- talkjunkie.vercel.app

Cricket Predictor — Solo Developer — *Sports analytics & prediction tool*
- Built a TypeScript-based cricket analytics tool exposing predictions and model-driven insights.
- Owned data flow, prediction layer and the UI.
- github.com/1faadi/cricket-predictor

Next.js AI Chatbot — Solo Developer — *LLM chatbot reference architecture*
- Built a Next.js AI chatbot integrating LLMs through Vercel AI SDK-style patterns — streaming, prompts, and chat persistence.
- Reusable as a starter for domain-specific assistants.
- github.com/1faadi/nextjs-ai-chatbot

Ambial — Solo Developer — *TypeScript web application*
- Designed and shipped a focused TypeScript web app on Next.js + Vercel with a clean, motion-aware UI.
- ambial.vercel.app

BinteShauq — Solo Developer — *Full-stack TypeScript web application*
- Delivered a full-stack TypeScript application with a Next.js front-end and server-side data flows on Vercel.
- Owned product, UI, and deployment end to end.

- binte-shauq.vercel.app

Additional Projects (GitHub)

- Hospital Management System (Laravel) — full-featured management application with user authentication, email verification and password-reset flows.
- E-Commerce Platform (Laravel) — multi-page online store with product catalogue, cart and order management.
- Single-Page CRUD Application (Vue.js + Laravel) — SPA demonstrating decoupled front end with a Laravel API back end.

More projects and live demos at sfak.space and github.com/1faadi.

EDUCATION

Bachelor of Science in Computer Science *Feb 2023 – Present (Expected Jan 2027)*
National University of Modern Languages (NUML), Islamabad

Intermediate (HSSC) *2020 – 2022*
Government College University (GCU), Lahore

Matriculation (SSC) *Completed 2020*
Sanai School System, Sargodha
